The seventeenth annual session of the State Council of Virginia of the Junior Order United American Mechanics will convene in this city on Tuesday morning. convene in this city on Tuesday morning at 9 o'clock in Lee Camp Hall. This is the regular incorporated State Council of the Order chartered by the Legislature in 1859. It will be the second annual session held since the Order's incorporation. It was held in Roanoke last season.

The convention will be called to order by Past-State-Councilor David S. Bottom, chairman of the local General Committee, who will introduce the speakers and preside during the opening session. and preside during the opening session.

Mayor Richard M. Taylor will deliver
the address of welcome to the members
and representatives on behalf of the city.

MR. GEORGE W. KINSEY, Council Treasurer Jr. O. U. A. M)

On behalf of the local Jumors, one of the local members, probably Councilman E. W. Miner, will welcome the visiting brothers to the city. One of the officers of the State Council will respond. State-Councillor R. E. Criddle will then be introduced and will occupy the chair furing the sessions, which will last several days.

In view of the fact that there is a diference existing between the State council and the National Council, there is considerable importance attached to hese sessions. The attendance will be very large, as there will be at least 100 oppresentatives on the floor besides the

How to Make Good Syrup from Sorghum.

For the filter at the cane mill us For the filter at the cane mill use clean, shredded corn fodder in place of straw. If there is no shredder in the neighborhood, run the dry cornstalks through the cylinder of any threshing machine. Renew the filter each morning. With the addition of a little bran or meal, the filtering material used on the previous day can be fed to the farm stock. After being filtered the excess of sold in the juice should be neutralized. acid in the juice should be neutralized by the judicious use of milk of lime. It should then be allowed to flow in a very thin layer of juice over a nearly level out somewhat extended surface, so as to thoroughly expose it to the clari-fying influence of sun and air, which would tend to free it from additional impurities and prepare it for the evaporat-

or fire-heated pan, a uniform and high degree of heat should be maintained until the semi-syrup stage of evaporation is reached. At this point it should be allowed to flow out of the main pan and be refined by refiltering; and, if time will permit, allow it to cool and settle. The refining pan should be set on a brick arch and the chimney flue should have arch and the chimney flue should have no connection with that of the main pan. The semi-syrup should be strained through flannel and emptied into the finishing pan. A sufficient fire should be started to bring this thin syrup up to the boiling point. Should there be twenty-five gallons of it, take one-half pint of sweet milk, the white of one egg. six tablespoonfuls of lime-water and mix these thoroughly together and as the these thoroughly together, and as the boiling increases pour this into the pan and stir the whole thoroughly for a short time, sufficiently at least to check the boiling. July 1st, 1902, is the time when no more pistols of the usual variety can be sold. The act provides that pistols 29 inches long and weighing three pounds may then be sold to those who want them. A weapon of this size, however, could not be concealed in the hip pocket, but the law goes further and prohibits the carrying of any sort of firearms, conceal-

ed or otherwise. It is said that there is no law against the selling of cartridges after July, 1802, which fit the pistols now in use, and no doubt after that time the regulation pistol will be sold as usual. No law can tol will be sold as usual. No law can prevent the importation of pistols in South Carolina from other States any more than it can prohibit the importation of whiskey. So that it will be easy to secure a pistol through your dealer, and unless the State establishes a pistol constabiliary there will be nothing to prevent pistols from being imported into the State.—Greenville (S. GAME IN MECKLENBURG.

Fox Hounds Catch a Deer and Fox in Three Hours' Hunt. (Special Dispatch to The Times.)

BOYDTON, VA., October 12.-A quantity of game is found in Mecklenburg this season, and the hunters are burg this season, and the hunters are waiting eagerly for the day to come when the law will permit them to hunt. Any number of Northern gentlemen came here in the fall for the purpose of hunting, and they turn loose a good deal of ready cash. In many instances they pay the taxes on one or two large farms for the exclusive privilege of hunting on it, then the lands are posted by the owners and no one can trespass upon them.

Speaking of hunting recalls a very remarkable experience Mr. E. W. Overby had, a short time since, with his pack of hounds, which for agility and endurance surpass anything I have ever known or heard of. Mr. Overby, with some other friends, started out one day lately at noon for a hunt. In a short time his dogs ran down and caught a deer and before 3 o'clock P. M. of the same day the same dogs had run down and caught a fox, so

dogs had run down and caught a fox, so the catching of both deer and fox was done in the short space of three hours.
